

Get all the feature rich functionality without the clutter and pain of having an on-site PBX solution. You not only save on capital hardware costs but automatically get the reliability of having your telephony system in the cloud.

BitCo

Voice

Our VPBX means that your calls divert to our data centres. We use our secure technology to re-route the call and direct it appropriately. This solution can provide you with a range of features not available on a traditional PBX. It is software based therefore installation is relatively quick and easy. It works with most VoIP, SIP compliant IP phones or analogue phones.

Reduce Capex Spend. Eliminate the Need for An On-Site PBX

Virtual Private Branch Exchange (VPBX), Cloud PBX or Hosted PBX is a cloud or hosted PBX solution. It is software based and completely replaces your traditional, hardware based PBX.
